

## TRANSFORMATION WORKSHOPS

# In Emerging Market Company

## A Half Day Workshop

**In Emerging Market Company** is a half-day workshop in which corporates get the opportunity to engage with emerging market youth within the confines of their board room or work environment and discuss the issue of the day. Perceived risks are reduced and the gap between participants is bridged. This is an extraordinary opportunity to interact amongst an intimate group (8 business delegates and 8 youth) in a facilitated environment in which rank is eliminated. Empathy between participants is harnessed and business leaders gain insights into the youth's environment, which results in both business and personal value.

**Gain real insights into youth employability  
to harness potential, discover rapport,  
find harmony and value.**

**gold [generation of leaders discovered]**
